

Apache HTTPD Build Script

It took a bit of time to get LDAP and SSL working correctly...

```
cd httpd-2.2.20
make distclean

./configure --prefix=/_apps/httpd/install --with-ldap --enable-mods-shared="all ssl ldap ca

# Build APR and APR-util seperatly due to LDAP issues
cd srclib
cd apr
./configure --prefix=/_apps/httpd/install --enable-threads --enable-other-child
make
cd ..
cd apr-util
./configure --prefix=/_apps/httpd/install --with-apr=../apr --with-ldap=ldap
make
cd ..
cd ..

make
```
