

Eclipse Plugin Update Sites

Every time I setup a new [Eclipse](#) instance, I have gone through the process of visiting the various web sites of the plugins I use to find the update URLs to install them. Generally this is an infrequent pain, but today, while troubleshooting some Eclipse/Java7 issues, I've had to hunt these links down a several times, so thought I'd list them here...

- http://subclipse.tigris.org/update_1.8.x
- <http://www.zereturnaround.com/update-site>
- <http://oxygenxml.com/InstData/Editor/Eclipse/site.xml>
- <https://dl-ssl.google.com/android/eclipse/>
