

# Modern Web Browsers

Help the World and Upgrade your Web Browser

I'm excited about HTML 5 and the rich user experiences it can offer, but with so many people using old web-browsers much of the capability cannot be used (reliably). If you're still using an older web-browser, please consider upgrading today. You would be helping to make the world a better place...

- [Firefox](#) - My everyday browser.
- [Chrome](#) - Growing on me, but I still don't trust Google.
- [Opera](#) - Always a strong contender.
- [Internet Explorer](#) - We all know IE, but Microsoft is definitely catching up.
- [Safari](#) - If you're using a Mac it's definitely a viable option. On a PC it works, but Chrome is better WebKit experience.
