

Subclipse 1.10 + Maven (M2E)

I had a tricky time getting the Eclipse Maven tool (m2e) to work in Eclipse Luna with the latest version of Subclipse 1.10.6. It turns out that the Maven SCM Handler for Subclipse (m2e-subclipse) linked to in the Luna Marketplace on the Sonatype site is no longer supported. The gory details and a .zip file containing an updated m2e-subclipse plugin are available at subclipse.tigris.org/issues/show_bug.cgi.
